

Amendments to the Specification:

Please amend the specification as follows:

Please amend paragraph [0026] of the specification as follows:

[0026] The lug 12 defines an aperture 13 and, at a position above the aperture 13, a projecting pip 14. The pip projects in a direction away from the rest of the lower housing element 1. The forwardly directed lug 213 defines an aperture 15 and, above the aperture 15, an outwardly directed pip 16 which is directed outwardly away from the rest of the lower housing element 1. It is to be appreciated, therefore, that the lower housing element 2 is in the form of a substantially channel-shaped element.
